

Call for Proposal Guidelines

The 2023 Conference in Alpena will be a great experience. Michigan's *undiscovered sanctuary* will offer tremendous field trips and other sessions which will provide environmental and outdoor educators an enjoyable and learned weekend.

Our 2023 [Call for Proposal form](#) includes all types of sessions (breakouts, workshops, and field trips). Please read the entire form before submitting. In 2023, we want to emphasize sessions on the Great Lakes, climate change, outdoor education, and natural history. Proposals with connections to Beaver Island and Lake Michigan *may* achieve a higher priority. Environmental/outdoor education sessions based on programs that demonstrate diversity and inclusivity will also garner attention by the selection committee.

Also, be aware that presenters are expected to pay the conference registration fee *unless* they only plan to present and NOT be included in any other conference events/sessions. Conference registration is scheduled to open June 1, 2023
